SALIVA**

THE GOOD NEWS...

Protecting your implants is simple

A small saliva sample can reveal if bacteria are putting your dental implants at risk.

WHY TEST?

YOUR SMILE DESERVES IT

- ★ Reveal harmful bacteria that can threaten implant health.
- ★ Catch problems early, before they turn into costly complications.
- ★ Peace of mind knowing your implant is being monitored.
- ★ Keep your implants strong and lasting with proactive care.

Did you know?
Implants are built to last.
Routine checks catch
early inflammation long
before it threatens your
investment.

STEP 1. ASK

Ask about saliva testing for your implant.

STEP 2. SWISH

Swish with the rinse.

STEP 3. SPIT

Spit into the tube.

STEP 4. SMILE

Smile knowing you've taken a preventative step to protect your dental implant.
